

July 30, 2016

I am a resident of (b)(6). I have lived in this area for most of my life here. My (b)(6) lived here all of his life and grew up here on the flowage.

This area has went from woods to fields. I have nothing against the farms.

People are getting cancer, having seizures here. I have noticed this increase in sicknesses in this area for the last 5 years. My (b)(6) moved here approximately two years ago and is now sick with cancer. He lives in town. My (b)(6) has seizures. I have been to 38 funerals in the last 6 to 8 months from around Wisconsin and the Upper UP. Some died from Cancer, some I don't know what they died from.

I drive around my town every day. Every day there is irrigators spraying on the road somewhere. I have not called this in to the Police, but it should be called in. I don't want to look like the bad ass, but I see it every day. I have seen brown liquid come out of these irrigators.

I do see the aerial sprayers fly down and spray the fields. I do see the chemicals come out of the plane onto the field and I also see and know when the spray nozzles are stuck open and they keep spraying when they go up into the air away from the field.

I would like to see clean water here in my Town, but I don't see that ever happening, not when you have mega farm, mega cranberries. I have nothing against them, but enough is enough.

I am not giving you my name because I live here in the (b)(6) and I don't want the harrassement, the vandalizism. I don't need the bullshit.
